

Coaching Accreditation - Levels of Progression

A progression of accreditation required by representative coaches

BY: Chris Reynolds, Daniel Rushworth and Rob Summers

The New South Wales Touch Association in August 2009 reviewed its current policy on representative coaches and the minimum standard required at state events.

Presently a level one coaches is defined as a beginning coach who is active at the affiliate level. A level two coach is defined as an intermediate coach who is active at representative level at regional, state and national events. A level three coach is defined as an experienced coach who is active at state and national level.

A number of years ago, it was deemed necessary for all affiliates who nominated a team(s) for entry into NSWTA events to at least have an accredited level one coach per team to be eligible for inclusion.

Over time the standard of play has improved, and continues to increase. However, the standard of coaches is felt to be being left behind.

To improve the standard of coaching in the state, the NSWTA has determined that the minimum coaching standard required at state events needs to once again be increased.

This will be achieved by steadily increasing the minimum coaching accreditation standard required over the next three years in three stages (see tables below for each event).

These three stages allow time for representative coaches to begin the process of upgrading and up-skilling their accreditation and be eligible to coach their respective divisions.

The NSWTA has committed itself for 2010 and beyond to increase the number of level one and two coaching courses to be conducted throughout the year.

Additionally as of October 2009, the NSWTA will begin to conduct regular quarterly coaching seminars for current accredited coaches to update and gain information on sport theory, techniques, skills, drills, trends, and game play.
